• ILEAGETI

• THE GEM

PROJECT PORTFOLIO

Welcome to my Project portfolio I've had the privilege of working on a diverse range of projects that showcase my ability to blend creativity with functionality. Each project reflects my commitment to creating user-centric designs that not only meet business goals but also enhance the overall user experience.

THE GEM

- The Grand Egyptian Museum (GEM) website aims to provide an engaging and informative digital experience that showcases the museum's exhibits, services, and cultural significance. The website should serve as a gateway for visitors to explore the museum's collections, plan their visits, and stay updated on events and news.

ILEAGETI

New online shopping app , exclusively design to purchase a variety of shoes and bags From aunique online for everyone

About

ILEAGETI Brand is a new online shopping app, exclusively design to purchase a variety of bags and shoes From a unique online for everyone.

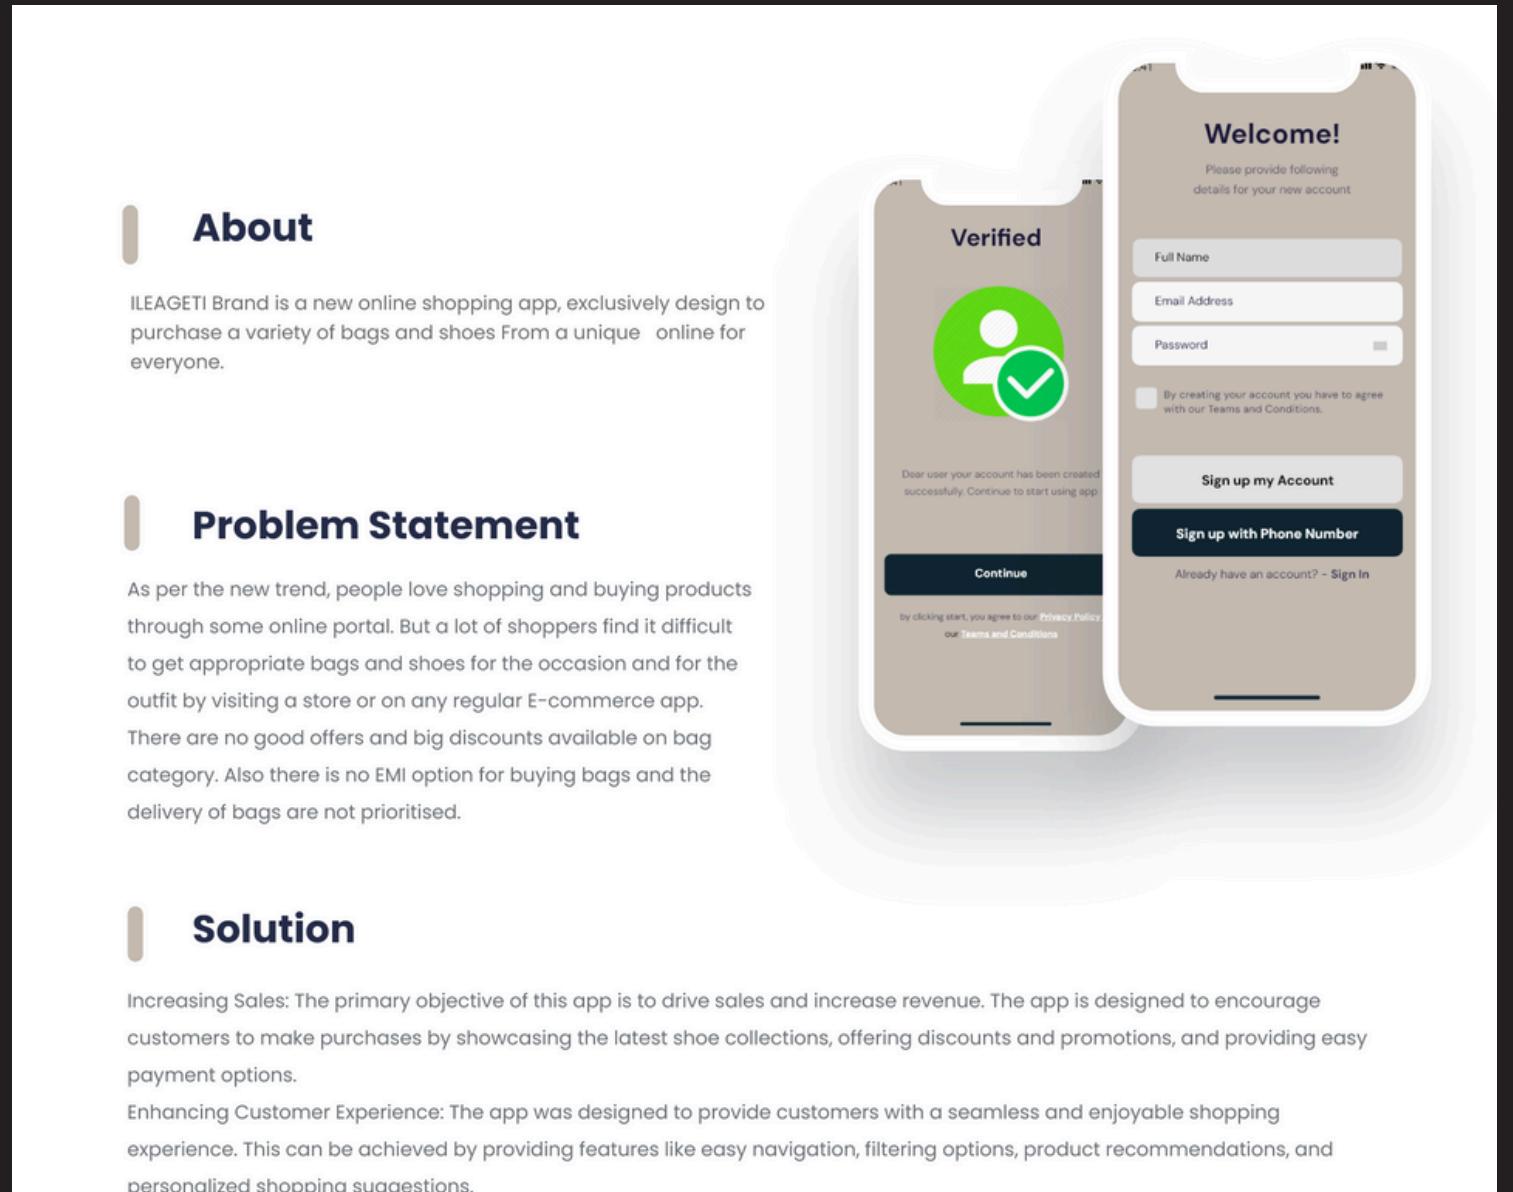

Problem Statement

As per the new trend, people love shopping and buying products through some online portal. But a lot of shoppers find it difficult to get appropriate bags and shoes for the occasion and for the outfit by visiting a store or on any regular E-commerce app. There are no good offers and big discounts available on bag category. Also there is no EMI option for buying bags and the delivery of bags are not prioritised.

Solution

Increasing Sales: The primary objective of this app is to drive sales and increase revenue. The app is designed to encourage customers to make purchases by showcasing the latest shoe collections, offering discounts and promotions, and providing easy payment options.

Enhancing Customer Experience: The app was designed to provide customers with a seamless and enjoyable shopping experience. This can be achieved by providing features like easy navigation, filtering options, product recommendations, and personalized shopping suggestions.
